Abstracts

The global Patch Fuse market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Patch Fuse is a type of fuse that is mounted directly to a printed circuit board using surface mount technology (SMT) rather than traditional through-hole technology. Chip Mount Fuses are commonly used in electronic equipment to protect against overcurrent, overvoltage and short circuit conditions. They are typically small in size and have a low profile, which makes them suitable for compact electronics where space is limited.

This report studies the global Patch Fuse production, demand, key manufacturers, and key regions.
