## Abstracts

According to our (Global Info Research) latest study, the global Patent Annuity Service market size was valued at US\$ 784 million in 2024 and is forecast to a readjusted size of USD 1362 million by 2031 with a CAGR of 8.3% during review period.

A patent annuity is a fee that a patent owner must pay to renew a granted patent. Otherwise it will lapse and as the patent owner will lose the previous rights on the regular expiry date. Over the past decade, the trend for maintaining patents has shifted to the use of patent annuity service providers. This includes law firms removing themselves from patent annuity management and referring clients to professional service providers.

Choosing a patent annuity specialist instead of paying directly or using an attorney can bring considerable benefits, such as:

Cost-effectiveness and savings through centralized management

External data monitoring and inspection

Timely renewal reminder

Understand and track state law updates

Ability to consolidate services (e.g. trademarks, patents, foreign applications, etc.) under one provider

The patent annuity service market is growth is driven by a number of factors, including:

**The increasing number of patent applications:** The number of patent applications is increasing every year, and this is driving the demand for patent annuity services. Businesses need to pay an annuity fee to maintain their patent rights, and they need to use a patent annuity service to manage these fees.

**The rising cost of patenting:** The cost of patenting is increasing, and this is driving the demand for patent annuity services. Businesses need to use a patent annuity service to manage their patent fees, and they need to ensure that they are paying the correct fees on time.

**The increasing complexity of patent law:** Patent law is becoming more complex, and this is driving the demand for patent annuity services. Businesses need to use a patent annuity service to ensure that they are complying with all patent laws and regulations.

**The growth of the global economy:** The global economy is growing, and this is driving the demand for patent annuity services. Businesses in emerging markets are increasingly filing for patents, and they need to use patent annuity services to manage their patent fees.
