According to our (Global Info Research) latest study, the global Patent Foramen Ovale Devices market size was valued at USD 134.5 million in 2023 and is forecast to a readjusted size of USD 224 million by 2030 with a CAGR of 7.6% during review period.

Patent Foramen Ovale (PFO), A hole in your heart would seem to be the very definition of a “problem.” Yet more than a quarter of the population has one, and for most it causes no adverse health effects. In fact, the vast majority of those affected don’t even know it.

PFO devices are used to close the hole between the heart's upper chambers, reducing the risk of stroke and other complications. Factors driving market growth include the increasing prevalence of PFO-related conditions, growing awareness about stroke prevention, and advancements in device technologies. The market is competitive, with several manufacturers offering PFO closure devices. However, challenges such as the need for specialized training, stringent regulatory requirements, and the availability of alternative treatment options may hinder market expansion. Nonetheless, the PFO devices market holds promising opportunities, driven by the need for effective and minimally invasive solutions for stroke prevention and the continuous development of innovative device designs.
