## Abstracts

As the demand for convenience foods and packaged foods has increased, chemical pollution outbreaks in the food processing industry have increased, and consumer awareness of food safety has increased. The increase in global outbreaks of foodborne diseases and the globalization of the food trade are driving demand for food safety testing services. The fastest-growing market for pathogen food safety testing is due to increased consumer awareness of pathogens in food, and effective technology trends are expected to drive the global market for pathogen testing. The lack of information on the safety characteristics of pathogens has led consumers to consider them unsafe to eat, which has driven the market for pathogen testing.
