According to our (Global Info Research) latest study, the global Parachute Fabrics market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Parachutes are usually made out of light, strong cloth, originally silk, most commonly nylon.

Parachute canopies were first made of canvas and silk. Then parachute manufacturers began using Nylon Fabric, Nylon turned out to be superior to silk because it was more elastic, more resistant to mildew, and less expensive. Recently, Dacron and Kevlar have been using for parachute canopies, but Nylon remains the most popular material. Other fabric components such as reinforcing tape, harness straps, and suspension are also made of Nylon Lines.
