The global Patient Controlled Analgesia Pump (PCA Pump) market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Analgesic pump is a liquid infusion device that can maintain a stable concentration of drugs in the blood, which can help achieve better analgesic treatment with less drugs. Patients are usually allowed to press themselves to add an additional infusion dose to the continuous infusion volume, so the treatment is more individualized and consistent with the characteristics of large individual differences in pain perception. It can be used for postoperative analgesia, cancer pain, labor analgesia, etc.
