Abstracts

A payment gateway is an e-commerce application that authorizes payments for e-businesses, online retailers, bricks and clicks, or traditional brick and mortar businesses. It transmits Transaction information to Acquiring Banks and responses from Issuing Banks (such as whether a transaction is approved or declined). In other words, the transaction flows through the payment gateway, to the payments ecosystem, and should it be approved, will eventually make its way into the merchant account.

SCOPE OF THE REPORT:

This report studies the Payment Gateways market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Payment Gateways market by product type and applications/end industries.

A payment gateway is a system connecting the merchant and the bank to facilitate online transactions. The term particularly refers to the server that transfers the customer's credit card information to the Internet Merchant Account for assessment. China is the largest countries of Payment Gateways in the world in the past few years and it will keep increasing in the next few years.
