According to our (Global Info Research) latest study, the global PbX Infrared Detector Single Element market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

PbX Infrared Detector Single Element is one of the upstream components of the detector equipment, mainly referring to the infrared detector unit based on lead (Pb) or its compounds (such as lead sulfide PbS, lead selenide PbSe, etc.) as sensitive materials. These detector single elements are key components in infrared technology. They can convert the received infrared radiation energy into electrical signals, thereby realizing the detection and measurement of infrared radiation.

The market is constantly changing, and the following points are worth noting:

The market concentration is high.

The EU RoHS3 directive restricts the use of certain hazardous substances in electrical and electronic equipment. It regulates the use and introduction of hazardous substances in electrical and electronic components. RoHS stands for the Restriction of Hazardous Substances Directive, which refers to the restriction of the use of hazardous substances such as lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) and polybrominated diphenyl ethers (PBDE).

Exemption 1c (Annex IV of EU Directive 2011/65/EU) currently applies to the use of lead in infrared detectors.

1. Medical technology - Exemption provisions, for the use of lead in infrared detectors, the exemption applies until July 21, 2023, as long as these detectors are used in medical monitoring and control equipment.

2. Industry - Exemption provisions, for the use of lead in infrared detectors, the exemption is available until July 21, 2024, as long as these detectors are used in industrial monitoring and control equipment.

3. Other - For other applications that do not fall under item 1 or 2 above, such as consumer and automotive applications, an exemption is available until July 21, 2024 for the use of lead in infrared detectors not used in medical technology or industrial monitoring and control equipment.
