The global PC/ABS market size is expected to reach \$ 6749 million by 2032, rising at a market growth of 4.1% CAGR during the forecast period (2026-2032).

PC/ABS alloy is an engineering thermoplastic created from a blend of PC and ABS. The unique balance of properties is dependent on the ratio of PC to ABS in the blend.

PC/ABS alloys offer excellent impact resistance and thermal stability, making them ideal for applications that require durability, such as automotive parts and industrial equipment. The automotive sector increasingly requires lightweight materials to improve fuel efficiency and reduce emissions. PC/ABS alloys are favored for components like dashboards and interior parts due to their strength and aesthetic qualities. Besides, with the rise of portable electronics and smart devices, the demand for durable, lightweight materials is growing. PC/ABS alloys are commonly used in housings and structural components for electronics. Increasing demand from downstream industries will promote the PC/ABS alloy market to grow.

Globally, Covestro, SABIC, Teijin, Trinseo and Mitsubishi are key manufacturers of PC/ABS alloy. Nearly 50% PC/ABS alloy sold are supplied by those five players.

This report studies the global PC/ABS production, demand, key manufacturers, and key regions.
