PCB coaxial connector is a high-frequency signal transmission interface designed for printed circuit boards (PCBs). Its core structure is based on the principle of coaxial cable, and it achieves low-loss and high-shielding signal transmission through the center conductor, insulation layer, and outer conductor shielding layer. It is directly integrated on the surface of the PCB and is used to connect RF modules, antennas, test equipment or other high-frequency components. It is an indispensable component in wireless communication, radar, satellite communication and other systems.
