ICT is the abbreviation of In Circuit Test. Its Chinese name is online tester (or ATE Auto Test Equipment). It is an automatic circuit board testing instrument, also known as a static tester (because it only inputs a very small voltage or current for testing and will not damage the circuit board). Online testing is a testing technology that does not disconnect the circuit or remove components. Its main function is to test the short circuit and open circuit of the circuit board and various electronic parts such as resistors, capacitors, diodes, transistors, transistors, ICs, etc. to see if they are wrong, missing, defective, or poorly assembled. It also clearly points out the specific location of the defect to help users ensure product quality and improve the efficiency of defective product repair.
