## Abstracts

The global PDS Antenna market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

PDS antenna refers to 'Phase Distribution System Antenna', that is, phase distribution system antenna. The PDS antenna is a high-performance antenna used in communications and radar systems. It adopts the design principle of a phase distribution system to achieve beamforming and directivity control of signals by controlling the phase and amplitude of each unit antenna in the antenna array. The PDS antenna has the advantages of fast scanning, high gain, low side lobes, and flexible and adjustable beam directivity. It is widely used in satellite communications, wireless communications, radar systems, aerospace and other fields, and can provide high-quality signal transmission and reception performance.

This report studies the global PDS Antenna production, demand, key manufacturers, and key regions.
