Abstracts

The global Pea Protein Meal Replacements market size is expected to reach $ 3976 million by 2032, rising at a market growth of 7.1% CAGR during the forecast period (2026-2032).

Pea Protein Meal Replacements refer to nutrition products formulated with pea protein as the primary protein source and designed to replace conventional meals while providing balanced macronutrients. These products typically contain pea protein isolate or concentrate combined with carbohydrates, dietary fiber, vitamins, minerals, flavoring ingredients and other functional nutrients.

The products are mainly used for weight management, sports nutrition, plant-based diets and convenient daily nutrition. Pea protein is widely adopted due to its plant origin, allergen-friendly characteristics, high protein content and compatibility with vegan and vegetarian lifestyles.

The market scope includes powdered meal replacement products, ready-to-drink formulations and nutrition shakes where pea protein is the main protein component. Pure pea protein ingredients, general protein supplements without meal replacement positioning, animal-based meal replacements and conventional food products are excluded.

In 2025, the global average selling price is approximately US$8.50 per kilogram, sales volume is approximately 285.00 thousand metric tons, and the estimated average manufacturer gross margin is approximately 38%.The upstream segment mainly includes pea raw materials, agricultural production, pea protein extraction equipment, enzymes, processing aids, flavors, sweeteners, vitamins and mineral ingredients.

info@marketpublishers.com

The midstream segment covers pea protein extraction, purification, drying, formulation development, blending, flavor adjustment, quality testing and meal replacement product manufacturing.

The downstream segment mainly includes nutrition brands, health food companies, e-commerce platforms, supermarkets, fitness channels and consumers seeking weight management or plant-based nutrition solutions.

The pea protein meal replacement market is benefiting from growing consumer interest in plant-based nutrition, weight management and convenient healthy food solutions. Compared with traditional animal-derived protein products, pea protein offers advantages including plant origin, sustainability and suitability for vegetarian consumers.

Product development is mainly focused on improving taste, texture, nutritional balance and functional benefits. Manufacturers are optimizing protein extraction technologies, flavor masking solutions and formulation strategies to improve consumer acceptance.

The expansion of fitness nutrition, clean-label food trends and demand for sustainable protein sources is creating additional growth opportunities. Ready-to-drink products and personalized nutrition solutions are also supporting market development.

Future market growth will be driven by increasing health awareness, plant-based consumption trends and innovation in functional meal replacement formulations.

Report Scope

This report studies the global Pea Protein Meal Replacements production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Pea Protein Meal Replacements and provides market size (US$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Pea Protein Meal Replacements that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Pea Protein Meal Replacements total production and demand, 2021-2032, (Kilotons)

Global Pea Protein Meal Replacements total production value, 2021-2032, (USD Million)

Global Pea Protein Meal Replacements production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (Kilotons), (based on production site)

Global Pea Protein Meal Replacements consumption by region & country, CAGR, 2021-2032 & (Kilotons)

U.S. VS China: Pea Protein Meal Replacements domestic production, consumption, key domestic manufacturers and share

Global Pea Protein Meal Replacements production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (Kilotons)

Global Pea Protein Meal Replacements production by Type, production, value, CAGR, 2021-2032, (USD Million) & (Kilotons)

Global Pea Protein Meal Replacements production by Application, production, value, CAGR, 2021-2032, (USD Million) & (Kilotons)

This report profiles key players in the global Pea Protein Meal Replacements market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Nestlé Health Science, Abbott Laboratories, Herbalife Ltd., Glanbia plc, The Simply Good Foods Company, Danone S.A., Huel Ltd., Orgain, Inc., SunOpta Inc., Roquette Frères, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.
