The global Pea Protein market size is expected to reach \$ 1354 million by 2032, rising at a market growth of 10.0% CAGR during the forecast period (2026-2032).

Pea protein is a food with a neutral taste that is used in dairy alternatives such as cheeses and yogurt. It is extracted from the yellow pea, *Pisum sativum*, and has a typical legume amino acid profile. In 2024, global Pea Protein production reached approximately 200.3 K MT, with an average global market price of around 2115 USD/MT.

The pea protein market is experiencing strong growth driven by increasing consumer demand for plant-based and allergen-free protein alternatives. Pea protein has gained popularity as a versatile ingredient used in a variety of products such as meat substitutes, dairy alternatives, functional beverages, and nutritional supplements. Its hypoallergenic nature, sustainability benefits, and alignment with clean-label trends make it an attractive option for food manufacturers aiming to meet evolving dietary preferences.

One of the key drivers of this market is the rising awareness of health and wellness, coupled with the growing adoption of vegetarian and vegan lifestyles. Food companies are increasingly incorporating pea protein into their formulations to provide high-quality protein without relying on animal sources. In addition to food and beverage applications, the use of pea protein is expanding into sports nutrition, as it offers essential amino acids and supports muscle recovery, making it a preferred alternative to whey or soy protein.

The market outlook is optimistic as innovation in processing technology enhances the

taste and texture of pea protein-based products. Companies are focusing on product diversification and partnerships to strengthen their presence in emerging regions where demand for plant-based food solutions is rising. Overall, the pea protein market is expected to continue its upward trajectory, driven by sustainability goals, health-conscious consumers, and the versatility of this ingredient in various applications.
