The global Peanut Harvester market size is expected to reach \$ 715 million by 2032, rising at a market growth of 5.2% CAGR during the forecast period (2026-2032).

Peanut harvesters are agricultural machines used for harvesting peanuts in the field. They mainly separate and collect mature peanut plants and pods from the soil through one or more steps, including digging, lifting vines, shaking off soil, spreading, picking, pod removal, cleaning, and collecting. Based on their operating methods, they can be divided into peanut digging and spreading machines, peanut picking harvesters, and peanut combine harvesters. This market typically does not include peanut shelling machines and standalone pod-picking machines used only in fixed locations. In 2025, global peanut harvester market is estimated to have reached approximately 23,500 units , with an average ex-factory price of about 21,200 US\$/Unit.

Growth in the global peanut harvester market is primarily driven by shrinking agricultural labor availability, rising manual harvesting costs, narrow harvesting windows, and the need to reduce pod losses, mold development, and quality deterioration caused by rainfall and changing soil conditions. These pressures are encouraging growers and agricultural service providers to adopt machines offering higher field productivity, lower harvesting losses, and greater mobility between production regions. Considerable mechanization potential remains in major peanut-producing areas of China, India, and Africa, while equipment subsidies, replacement programs, custom-hiring centers, and machinery-sharing models are making specialized harvesters more accessible to small and medium-sized farms. In the United States and South America, large commercial farms continue to support replacement demand for high-capacity digger-inverters, six-row or wider pull-type combines, and self-propelled machines; U.S. peanut planting expanded to approximately 1.9 million acres in 2025, further increasing the potential

workload for dedicated harvesting equipment.
