Abstracts

According to our (Global Info Research) latest study, the global PEEK Compound market size was valued at US\$ 459 million in 2025 and is forecast to a readjusted size of US\$ 656 million by 2032 with a CAGR of 5.3% during review period.

Polyether ether ketone (PEEK) is a semi-crystalline high temperature thermoplastic that offers a unique combination of exceptional performance characteristics. PEEK has excellent long term chemical resistance and also offers thermal and mechanical properties. PEEK is used to make some specialized components, which are used in their various applications. PEEK has excellent strength, rigidity and toughness at elevated temperatures, chemically resistant to most common solvents, has low moisture absorption, superior electric properties, with FDA compliant, and relatively low smoke and gas emissions.

Composite PEEK refers to a variation of Polyether Ether Ketone (PEEK) that has been enhanced or reinforced with the addition of other materials, typically in the form of fibers or particles. These added materials, known as reinforcements or fillers, can include substances like carbon fibers, glass fibers, ceramics, and even metals.

The purpose of adding these reinforcements to PEEK is to improve its mechanical, thermal, and/or electrical properties. Composite PEEK is often used in applications that require higher strength, stiffness, wear resistance, or other specialized characteristics beyond what standard PEEK can provide.

Europe and Asia-Pacific are the major production region, with a revenue market share of 42% and 34%.

In terms of consumption region, Europe is the largest region of PEEK Compound in the world in the past few years and it will keep increasing in the next few years. Europe market took up about 40% the global market, while Asia-Pacific and North America were about 29% and 28%.

PEEK Compound are mainly applied in the fields: Aerospace and Automotive, Machinery and Energy, Electrical and Electronic, Medical and Healthcare and Others. In terms of revenue, Aerospace and Automotive was the most widely used application which took up about 31% . PEEK Compound is divided into Glass Fiber Reinforced PEEK, Carbon Fiber Reinforced PEEK and Others.

The PEEK Compound market is relatively concentrated with few companies. The PEEK Compound market competition will be still intense. Victrex, Evonik, Syensqo, Ensinger, ZYPEEK and Zhejiang PFLUON is the leading manufacturer in the global PEEK Compound market. Top 5 of listed players accounted for 79% of the market share.

Market trends and prospects

Application field expansion: As the market's understanding of PEEK's characteristics continues to deepen, and PEEK resin production and technology continue to improve, its consumption will gradually increase, and its application fields will continue to expand. In addition to traditional fields such as transportation, electronic information, and medical devices, the application of PEEK compounds in the low-altitude economy is also expected to drive market growth. For example, the lightweight advantage of PEEK compounds can effectively reduce the weight of aircraft, thereby increasing payload and improving aircraft performance and safety.

Rise of domestic manufacturers: Domestic manufacturers are actively catching up in the field of PEEK compounds. With the development of domestic PEEK manufacturers and overseas companies such as Victrex investing in factories in China, the domestic PEEK compound market will continue to expand. At the same time, domestic manufacturers are also constantly improving their own technical level and production capacity to meet market demand.
