## Abstracts

The global Peeling Tape for Electronic Products market size is expected to reach \$ 2307 million by 2032, rising at a market growth of 6.8% CAGR during the forecast period (2026-2032).

Peeling tape for electronic products is a specialty adhesive tape (often with controlled peel force and clean-removal behavior) used in electronics and semiconductor manufacturing to temporarily protect, mask, hold, laminate, pick-up, or transfer components/films during processing, enabling residue-free removal and minimizing surface damage to wafers, glass, PCBs, films, and sensitive coatings.

Upstream suppliers provide polymer films (PET/PI/PO), release liners, acrylic/silicone/rubber adhesive resins, tackifiers, photoinitiators for UV release, additives for low-ion contamination, and cleanroom-grade packaging; midstream tape producers formulate controlled-adhesion PSAs, coat and cure adhesive layers onto precision backings, slit/rewind into jumbo rolls, and converters die-cut and laminate tapes into carrier formats while verifying peel force, residue, outgassing, and particle levels; downstream, semiconductor fabs, OSATs, display makers, PCB plants, and EMS lines consume peeling tapes for temporary protection/holding during grinding, dicing, lamination, assembly, and rework, driving recurring demand tied to electronics production cycles.

Typical 2024–2026 initiatives include capacity expansions for UV and thermal release tapes in Asia to support advanced packaging and panel-level processing, new product development for ultra-low residue and low-ion grades compatible with high-NA lithography environments, wider-width coating lines for large display panels and glass substrates, converter investments in high-precision die-cutting and multilayer lamination

for carrier tapes used in mini/micro-LED and camera modules, and sustainability projects such as solvent-reduction coating, thinner backings to cut waste, and improved recycling pathways for release liners and film carriers.

2025 Global Market sales Volume: 1.8 billion m<sup>2</sup>. Average Global Market Price: USD 0.8 per m<sup>2</sup>. Market Average Gross Profit Margin: 25%.
