Abstracts

Pendant Pushbutton Control Units are a series of simple switches that control much larger electrical loads through various means. This causes the machine to move to and from the desired point. A pendant control hangs down from the hoist or off of a separate festoon track and allows the operator to control the crane and the load as it moves down the runway. A handheld controller with push buttons is directly wired into the hoist or a separate festoon track and hangs down to be used by the operator.
