Abstracts

The global Pentachlorobenzenethiol Zinc Salt market size is expected to reach \$ 20.12 million by 2032, rising at a market growth of 1.8% CAGR during the forecast period (2026-2032).

Pentachlorobenzenethiol Zinc Salt (Zn-PCTP) is a highly efficient rubber and plastics processing aid and antioxidant, primarily used in the plasticizing process of natural and synthetic rubbers (such as styrene-butadiene rubber, butadiene rubber, and chloroprene rubber). It effectively shortens the plasticizing time of rubber compounds, improves rubber processing performance, and is also an important activator in golf ball core production.

The core upstream precursor is pentachlorothiophenol, produced by the reaction of hexachlorobenzene with sodium sulfide or pentachlorobenzene with sulfur. The production process also requires zinc oxide or zinc sulfate as a zinc source, as well as specific organic activators and dispersants. Global sales in 2025 were approximately 3,000 tons, with an average selling price of approximately US\$5,814 per ton. The industry's gross profit margin is around 25%.

This report studies the global Pentachlorobenzenethiol Zinc Salt production, demand, key manufacturers, and key regions.
