## Abstracts

According to our (Global Info Research) latest study, the global Pepper Sprays and Bear Spray market size was valued at US\$ 67.09 million in 2025 and is forecast to a readjusted size of US\$ 107 million by 2032 with a CAGR of 6.8% during review period.

Pepper spray, also known as OC spray (oleoresin capsicum spray), is a non-lethal aerosol spray that is primarily used for self-defense and crowd control. It is derived from chili peppers and contains concentrated capsaicinoids, which are the active components responsible for its effects.

Bear spray is a specialized aerosol deterrent designed to deter aggressive or charging bears by temporarily irritating their eyes, nose, and respiratory system with a powerful pepper-based formulation. In 2025, global Pepper Sprays and Bear Spray production reached approximately 3260 k units, with an average global market price of around 20 US\$/Unit. The production capacity of Pepper Sprays and Bear Spray reaches 4100 k units, and the industry's gross profit margin is approximately between 30% and 50%.

The market demand for pepper spray and bear spray is primarily driven by factors such as increased public safety awareness, the rise in outdoor activities, increased demand for personal defense tools among people living alone or traveling at night, and the growing overlap between wildlife habitats and human activity areas. In urban environments, increased acceptance of non-lethal self-defense methods has propelled portable pepper spray into the everyday protection choice; while in outdoor scenarios such as hiking, camping, and hunting, bear spray has become essential equipment due to its proven effectiveness in deterring large wild animals. Furthermore, increasingly clear product regulations, widespread user training, and continuous improvements in

safety and effectiveness by manufacturers have further boosted consumer confidence and promoted the widespread adoption of this product category globally.
