According to our (Global Info Research) latest study, the global Peptide API Development and Manufacturing market size was valued at US\$ 4101 million in 2025 and is forecast to a readjusted size of US\$ 13270 million by 2032 with a CAGR of 18.2% during review period.

Peptide API Development and Manufacturing refers to the integrated activities involved in process development, analytical development, quality studies, scale-up, GMP manufacturing, and commercial supply of therapeutic peptide active pharmaceutical ingredients, with peptide drug substances and related intermediates, rather than finished dosage forms, as the core deliverables. The field is typically based on solid-phase peptide synthesis, liquid-phase fragment coupling, and hybrid manufacturing approaches. Its upstream supply chain mainly includes protected amino acids, specialty amino acids, resin supports, coupling reagents, cleavage and deprotection reagents, organic solvents, purification media, analytical consumables, and GMP packaging materials, while the main downstream customers are innovative pharmaceutical companies, biotechnology firms, specialty generic drug developers, and other drug manufacturers that formulate peptide APIs into injectables, lyophilized products, or other dosage forms. The global gross margin of Peptide API Development and Manufacturing in 2025 is estimated at 25%-40%.
