According to our (Global Info Research) latest study, the global Peptide Conjugation Services market size was valued at US\$ 142 million in 2025 and is forecast to a readjusted size of US\$ 208 million by 2032 with a CAGR of 5.5% during review period.

Peptide Conjugation Services are customized life-science and biopharmaceutical services that covalently or site-selectively link peptides with other molecules, such as carrier proteins, antibodies, fluorescent dyes, biotin, PEG linkers, oligonucleotides, small-molecule drugs, toxins, nanoparticles, or surfaces, to improve targeting, stability, detection, immunogenicity, assay performance, or drug-delivery functions.

The industry is growing with rising demand for peptide-drug conjugates, targeted delivery systems, peptide vaccines, antibody generation, diagnostic assays, fluorescent/biotin-labeled peptides, PEGylated peptides, and customized research tools; opportunities are strongest in oncology, immunology, molecular diagnostics, drug discovery, and outsourced CDMO services, while challenges include conjugation-site control, purity, batch consistency, linker stability, analytical validation, scale-up difficulty, GMP compliance, high technical labor cost, and competition from broader bioconjugation service providers.
