Perfluoropolyether base oil has good lubricating ability, perfluoropolyether formed on the steel surface of the inorganic membrane - organic membrane double layer membrane is an important reason for its anti-wear. Due to the formation of organic film belongs to the elastic flow lubrication membrane, it can reduce the direct contact between the friction vice, thus reducing the friction and wear; in the steel surface of the abrasion marks covered with metal fluoride and polymer double-layer film, abrasion marks on the fluoride film belongs to the boundary lubrication membrane, can reduce the coefficient of friction.
