Abstracts

Performance elastomers are high performance synthetic rubbers that have a high resistance to heat, oil, compression set, acids, and solvents.

Scope of the Report:

This report focuses on the Performance Elastomers in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Among the end-use industries, the automotive and transportation industry is projected to lead the performance elastomers market during the forecast period. Because of the implementation of stringent environmental regulations regarding emission levels, the design of vehicles has changed drastically over the past few decades. The manufacturers are designing vehicles to be compact, lightweight, and more efficient. For this the vehicle manufacturers require a performance elastomer. This demand ultimately drives the performance elastomers market.

Asia-Pacific is estimated to lead the performance elastomers market because of the rising demand for performance elastomers from the automotive and transportation industry. The population in Europe is the second-largest consumers of performance elastomers globally. In addition, increasing disposable income and increasing demand from the automotive and transportation industry are fueling the demand for performance elastomers in various applications.

The worldwide market for Performance Elastomers is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
