According to our (Global Info Research) latest study, the global Performance Polyolefins market size was valued at USD 556.7 million in 2023 and is forecast to a readjusted size of USD 865.5 million by 2030 with a CAGR of 6.5% during review period.

Polyolefin used for flexible packaging provides convenience and durability, which is preferred by consumers. Consumer, retail, and technology trends have contributed towards a gradual shift from rigid packaging to flexible packaging in the recent years. Busier lifestyles due to increase in urbanization have led consumers to choose convenient and portable food products with easy-to-open packaging, which produces less waste. In addition, growing demand for miniature packages for consumer products that are light in weight and convenient for travel purposes has shifted the consumer preference from rigid packaging to flexible packaging. This shift in preferences has increased the consumption of flexible packaging, which, in turn, is driving the demand for polyolefin.
