## Abstracts

According to our (Global Info Research) latest study, the global Perfusion Bioreactors market size was valued at USD 696.6 million in 2023 and is forecast to a readjusted size of USD 1265.3 million by 2030 with a CAGR of 8.9% during review period.

Perfusion is a means to maintain a cell culture bioreactor in which equivalent volumes of media are simultaneously added and removed from the reactor while the cells are retained in the reactor.

Perfusion bioreactors offer several advantages over traditional fed-batch bioreactors when addressing problems of scalability and increasing demand.

Perfusion bioreactors culture cells over much longer periods, even months, by continuously feeding the cells with fresh media and removing spent media while keeping cells in culture. In perfusion there are different ways to keep the cells in culture while removing spent media.

Global Perfusion Bioreactor key players include Sartorius AG, Thermo Fisher, GE Healthcare Life Sciences, Pall, Eppendorf AG, etc. Global top five manufacturers hold a share over 50%.

North America is the largest market, with a share over 40%, followed by Asia-Pacific, and Europe, both have a share over 40 percent.

In terms of product, Mid-Scale (100Liters to 1,000 Liters) is the largest segment, with a share over 45%. And in terms of application, the largest application is

Biopharmaceutical, followed by Biotechnology, etc.
