Scope of the Report:

This report focuses on the Perimeter Security in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The market for residential, educational, and religious buildings vertical is expected to grow at the highest rate between 2018 and 2023. As the rate of theft and burglary is increasing globally, security is becoming a major concern for individuals and residential complexes, such as private residential buildings. Such concerns are increasing the demand for security solutions, such as biometrics-based electronic locks and sensor-based intruder alarm systems. Thus, the increasing need for safety and security of people, and the personal belongings in the residential sector is driving the growth of this market.

North America is expected to hold the largest share of the global perimeter security market. The rising need for security against increasing terrorist activities, illegal immigration, and criminal activities are said to be the major factors enhancing growth of the perimeter security market in North America. Furthermore, strict government regulations for safety and security, and technological developments in perimeter security solutions, such as video surveillance, are expected to fuel the growth of the market in this region. The perimeter security market in Asia Pacific (APAC) is projected to grow at the highest CAGR during the forecast period. The growth of the perimeter security market in APAC can be attributed to the continuous rising investment of big and

small organizations for physical security measures. Furthermore, the increasing demand for perimeter security solutions in growing economies, such as India, China, Australia, and Japan, is also influencing the growth of the perimeter security market in the APAC region.

The worldwide market for Perimeter Security is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
