According to our (Global Info Research) latest study, the global Permanent Modular Building market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Modular buildings and modular homes are prefabricated buildings or houses that consist of repeated sections called modules. 'Modular' is a construction method that involves constructing sections away from the building site, then delivering them to the intended site. Installation of the prefabricated sections is completed on site.

Prefabricated sections are sometimes placed using a crane. The modules can be placed side-by-side, end-to-end, or stacked, allowing a variety of configurations and styles. Permanent modular structures are fabricated and installed for long-term use. They are designed to be durable, just like conventional buildings, and can last just as long (or longer) than traditionally-constructed buildings.

In the North American market, Permanent Modular Building key players include Clayton Homes, Skyline Champion Corporation, Dexterra Group, Cavco Industries, Atco etc. Those players hold a share about 30%.
