## **Abstracts**

Personal care ingredients are substances that are used in the production of skin care products, hair care products, cosmetics, fragrances and toiletries, and oral hygiene products. These ingredients provide personal care products with pleasant aromas, moisturizing capabilities, and conditioning features.

### **Scope of the Report:**

This report focuses on the Personal Care Ingredients in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. By application, the skin care segment dominated the personal care ingredients market in 2017. The personal care ingredients market is driven by the growing demand for anti-aging and anti-acne creams from growing aging population in countries such as the U.K., Japan, the U.S., Canada, Germany, France, and Italy, among others. The segment is also estimated to witness the highest growth rate between 2018 and 2023. Asia-Pacific dominated the personal care ingredients market in 2017, in terms of value. Growing population and rapid urbanization, along with the increase in per capita spending on personal care products in highly developing economies such as China, South Korea, India, and Indonesia is contributing towards the growth of the personal care ingredients market in this region.

The worldwide market for Personal Care Ingredients is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
