## Abstracts

The global Personal Flotation Devices market size is expected to reach \$ 3325 million by 2032, rising at a market growth of 4.1% CAGR during the forecast period (2026-2032).

Personal flotation device (abbreviated as PFD; also referred to as a life jacket, life preserver, life belt, Mae West, life vest, life saver, cork jacket, buoyancy aid or flotation suit) is a piece of equipment designed to assist a wearer to keep afloat in water. The wearer may be either conscious or unconscious. It is equipped with buoyant materials such as foam or inflatable chambers that provide the necessary upward force to keep a person's head above water.

With the growing popularity of water sports such as surfing, kayaking, and jet skiing, people are becoming more aware of water safety. Government regulations mandating the use of personal flotation devices (PFDs) in water activities are also becoming stricter, which drives market growth. In end - use industries like construction, mining, and oil and gas, there is a greater focus on employee safety. The mandatory use of PFDs as safety gear in these industries is fueling market growth. Manufacturers are using innovative lightweight materials, adopting ergonomic designs and advanced buoyancy technologies, and integrating smart technologies to improve the safety features of PFDs. These advancements are increasing the appeal and functionality of PFDs, creating growth opportunities.
