Abstracts

PET (polyethylene terephthalate) is a safe, recyclable packaging material. Compared with aluminum cans and glass bottles, PET containers are more environmentally friendly and more cost-effective, and air compressors are the main equipment in plastic processing plants, requiring a lot of compressed air to blow PET or PP preforms into bottles. PET air systems start with high numbers of three-stage air-cooled lubricated piston units for smaller systems, and water-cooled, oil-free, three- or two-stage boosters for larger systems. Four-stage centrifuges have become a popular base-load air compressor over the past decade, while smaller companies are beginning to adopt air-cooled, single-stage lubricated superchargers.

According to our (Global Info Research) latest study, the global PET Compressors market size was valued at US\$ 530 million in 2023 and is forecast to a readjusted size of USD 843 million by 2030 with a CAGR of 6.8% during review period.

The core manufacturers of PET Compressors are Gardner Denver, AF Compressors and Atlas Copco, and the top three manufacturers in the world have a combined market share of 40%.
