This report focuses on the Pet Food Ingredient in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. On the basis of the ingredient, the meat & meat products segment accounted for the largest share, followed by the cereals segment, in 2017. Meat & meat products are obtained at a relatively lower cost, as the majority of these ingredients are byproducts of food products manufactured for human consumption. Thus, it serves as an economical solution for the pet food manufacturers. Along with being cost-effective, meat & meat products enhance the palatability and acceptability of pet food.

The Asia Pacific region is projected to be the fastest-growing market, owing to the increasing rate of pet adoption by the growing number of nuclear families in countries such as China, India, and Japan.
