Abstracts

Pet food packaging is the packaging of pet animal food to avoid contamination and to ensure freshness of animal feed. Pet food packaging involves high barrier packaging to protect the pet food from oxygen and moisture and resist grease, odor, and tearing. Majority of the pet food is primarily packaged in metal cans, multiwall bags, and pouches. Raw materials used in the manufacturing of pet food packaging include paper & paperboard, plastics and laminates, steel, and aluminum. Being cost effective, plastics are widely used in pet food packaging. Moreover, plastics offer high barrier properties and are durable as compared to other raw materials involved in the manufacturing of pet food packaging.
