According to our (Global Info Research) latest study, the global Pet Leash Appliance market size was valued at US\$ 4013 million in 2024 and is forecast to a readjusted size of USD 7281 million by 2031 with a CAGR of 9.0% during review period.

Pet leash appliance is an important tool for controlling and managing the direction and speed of pets (especially dogs and cats). It generally includes components such as leash, collar and chest harness. The leash is the core part of pet leash, which is used to directly connect the pet and the owner so that the owner can control the pet's movement. There are many types of leash, each with its own unique characteristics and applicable scenarios.

With the continuous development of the global pet economy, pet traction equipment, as an important part of pet products, has a growing market demand. The increase in the number of pets, the attention of pet owners to pet health and management, and the continuous expansion of the pet consumer market have provided a broad space for the development of pet traction equipment.

Pet owners' demands for pet traction equipment are becoming increasingly diversified, requiring not only basic functionality of the products, but also more attention to the comfort, fashion and personalization of the products. For example, some pet owners will buy multiple traction ropes for use in different occasions, or choose collars and chest harnesses with special functions (such as anti-escape, training, etc.). This diversified demand has promoted the continuous innovation and upgrading of the pet traction equipment market.

With the continuous advancement of science and technology and the continuous innovation of materials, the production technology and product quality of pet traction equipment are also constantly improving. For example, the popularization of retractable traction ropes and the emergence of intelligent traction ropes provide pet owners with a more convenient and safe way to manage their pets. At the same time, the application of new materials also makes pet traction equipment more durable, comfortable and environmentally friendly.

The rise of social media and e-commerce platforms has provided new channels for the promotion and sales of pet traction equipment. Through sharing and recommendations on social media, pet traction equipment can reach target consumers more quickly and form a good word-of-mouth effect. E-commerce platforms provide more convenient and diversified purchasing methods, allowing pet owners to buy their favorite products anytime and anywhere.
