According to our (Global Info Research) latest study, the global Pet Oxygen Machine market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

With the development of molecular sieve pressure swing adsorption principle oxygen generation technology, the oxygen generator that uses air as raw material and physical oxygen generation has almost become the standard configuration of pet hospitals. Compared with bulky oxygen cylinders, the oxygen concentrator is easy to move, and the oxygen can be used as soon as it is opened. There is no safety hazard of a high-pressure tank, and it saves the trouble of daily tank replacement and inflation. One machine is multi-purpose, meeting various needs such as animal anesthesia machine oxygen supply, postoperative oxygen supply, ICU oxygen supply, first aid oxygen supply, etc.

Oxygen supply unit designed for veterinary clinical applications. Using the principle of molecular sieve pressure swing adsorption, using air as raw material, high-purity oxygen is physically separated to meet various clinical needs of veterinarians.
