## Abstracts

According to our (Global Info Research) latest study, the global Pet Products Testing Service market size was valued at US\$ 4023 million in 2025 and is forecast to a readjusted size of US\$ 7044 million by 2032 with a CAGR of 8.3% during review period.

Pet Products Testing Service refers to third-party testing, inspection, verification, and compliance evaluation services for pet-related products, including pet toys, collars, leashes, beds, apparel, feeding products, grooming products, litter products, pet food, and treats. The service checks whether products meet safety, quality, chemical, microbiological, mechanical, labeling, and regulatory requirements, such as toxic substance limits, choking or sharp-edge risks, flammability, durability, nutritional composition, heavy metals, allergens, and international standards such as ASTM F963, EN71, California Prop 65, FDA-related pet food requirements, and other market-specific regulations.

The Pet Products Testing Service industry is growing with the expansion of global pet ownership, premium pet products, e-commerce pet product sales, and rising consumer concern over product safety, material quality, ingredient transparency, and sustainability. Opportunities come from stricter retailer compliance requirements, cross-border trade, private-label pet brands, pet food safety testing, chemical testing for toys and accessories, and demand for independent verification to build consumer trust. However, the industry also faces challenges such as fragmented regulations across countries, limited mandatory standards for some non-food pet products, price pressure from small brands, fast product cycles in online marketplaces, and increasing complexity in testing multi-material, electronic, smart, edible, and eco-friendly pet products.
