Abstracts

PET (polyethylene terephthalate) is a plastic resin and form of polyester widely used for packaging foods and beverages, especially convenience-sized soft drinks, juices and water.

Scope of the Report:

This report focuses on the PET (Resin) in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Asia is the largest PET resin producer followed by North America, Europe and MEA. Demand of recycled PET (RPET) has increased over the past few years due to high virgin PET prices and new PET reclamation plants getting operational. Recent high volatility in energy and raw materials prices and growing concern about carbon footprint and sustainability have encouraged companies to use renewable and bio-based feedstocks for the production of PET. Challenges faced by the industry include high PTA (Purified Terephthalic acid) and MEG (Monoethylene Glycol) prices and reduction in bottle weights.

The worldwide market for PET (Resin) is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
