## Abstracts

The global Pet Sterilization and Deodorization Spray market size is expected to reach \$ 862.3 million by 2029, rising at a market growth of 4.0% CAGR during the forecast period (2023-2029).

According to Our PET Supplies Research Center, the global pet industry reached \$ 261 billion in 2022, a year-on-year increase of 11.3%. The United States gains the highest pet penetration rate and becomes the largest pet market. According to the American Pet Products Association (APPA), 66% of American households keep pets, and the total industry sales was about US\$136.8 billion, an increase of 10.8% over 2021. According to IVH, the German pet products industry association, the number of pets in Germany reached 33.4 million in 2022, with a total turnover of nearly ?6.5 billion. The 2023 China Pet Industry Trend Insight White Paper released by JD shows that the market size of the four major pet physical commodities is increasing year by year: pet supplies account for 45%, pet staple food accounts for nearly 35%, pet snacks account for 12%, and pet medicine and health care account for 37%.

The natural deodorant is atomized by the deodorizing equipment to form a mist, and the radius of the dispersed droplets in the space is less than or equal to 0.04mm. The droplet has a large specific surface area and a large surface energy, with an average of about tens of kilocalories per mole, and the energy of this order of magnitude is already 1/3-1/4 of the bond energy in many elements. The surface of the solution can not only effectively absorb the odor molecules in the air, but also change the three-dimensional configuration of the adsorbed odor molecules, weaken the bond in the odor molecules, and increase the instability of the odor molecules. Reacts chemically with other molecules and with acidic buffers in plant juices, resulting in an odorless, non-toxic substance. For example, hydrogen sulfide reacts under the action of plant sap to

generate sulfate ions and water; ammonia under the action of plant sap generates nitrogen and water.
