Abstracts

The global PET Strapping market size is expected to reach \$ 993 million by 2032, rising at a market growth of 3.3% CAGR during the forecast period (2026-2032).

Polyester strapping is characterized by a very consistent tensile strength and very high elongation. Characteristics that are most decisive factor for a safe and reliable strapping method. Unlike strapping made from steel, Polyester strapping having its very high elongation, is able to absorb shocks and impacts during transportation and handling far better than steel strapping is capable of. The excellent elongation allows the substitution for the same application with Polyester strap having a lower breaking strength.

Global PET Strapping key players include Signode, Cordstrap, etc. Global top two manufacturers hold a share about 23%. China is the largest market, with a share over 25%, followed by North America and Europe, have a share about 50 percent. In terms of product, Smooth PET Strapping is the largest segment, with a share about 75%. And in terms of application, the largest application is Paper Industry, followed by Wood Industry, Food & Beverage, Textile Industry, etc.

in 2022, The Teufelberger Group has acquired its Polish competitor Maillis Plastics Solutions (MPS) to expand its plastics processing division. The takeover secures MPS' high-performance steel wire ropes, fiber ropes and strapping capabilities.

This report studies the global PET Strapping production, demand, key manufacturers, and key regions.
