According to our (Global Info Research) latest study, the global PETG Plastic Sheet market size was valued at US$ million in 2025 and is forecast to a readjusted size of US$ million by 2032 with a CAGR of %during review period.

PETG (Polyethylene terephthalate glycol), thermoplastic polyester that provides excellent toughness, chemical resistance and is easy to thermoform. With its low forming temperature, PETG can be readily vacuumed and pressure-formed as well as heat bent. PETG fabricates well using processes like die cutting, drilling, routing, and bending. PETG is a high impact, co-polyester material, but it does not hold up well in outdoor applications. Because of its soft surface it is also vulnerable to scratching in high contact environments. It is also FDA compliant, so it can be used in medical and food applications.
