Petroleum and fuel dyes is general name for a family of aromatic substance, either organic or synthetic, which are used to add colour characteristics to Fuels and other petroleum products. These complex unsaturated substances have inherent characteristics like solubility and intense colour, and exhibits good affinity towards substrate on which it is being applied.

Petroleum and Fuel Markers, on the other hand, are colourless substances, which when added to fuel, are detected by adding a specific reagent to produce a characteristic colour, and can also be detected by placing the sample in a spectrophotometer to produce an equivalent result.

The industry's leading manufacturers are Dow, John Hogg and Innospec, with revenues of 27.25%, 20.48% and 13.57% respectively in 2019.
