Abstracts

The global Pezolercept market size is expected to reach \$ 449 million by 2032, rising at a market growth of 12.1% CAGR during the forecast period (2026-2032).

Spesolimab is a humanized monoclonal antibody targeting the interleukin-36 receptor (IL-36R), a targeted immunological biologic agent. It specifically binds to and blocks the IL-36 receptor signaling pathway to suppress excessive inflammatory responses in the skin and related tissues. Primarily indicated for the treatment of autoinflammatory skin diseases such as generalized pustular psoriasis, it represents a precision-targeted therapy against the pathogenesis of pustular psoriasis, characterized by rapid onset and high specificity in clinical practice. In 2025, global Spesolimab production reached approximately 18,000-22,000 vials

Spesolimab, the world's first IL-36 receptor-targeted biologic exclusively developed for generalized pustular psoriasis (GPP), holds a first-in-class monopoly in the global rare dermatology market by addressing a long-standing unmet medical need with its precise mechanism that blocks the core inflammatory pathway and rapidly controls life-threatening symptoms. Approved in over 40 countries and regions worldwide, its global commercialization has been fully transferred to LEO Pharma, which leverages its specialized dermatology platform and global network to enhance disease awareness and treatment access. Positioned as a high-value orphan drug, it adopts a premium pricing strategy supported by strong clinical evidence; despite a limited patient population, it benefits from a clear competitive landscape with no direct same-target competitors, and its long-term growth hinges on indication expansion, approval of subcutaneous maintenance therapy, and broader insurance coverage. Characterized by a niche but essential market, specialty-driven promotion, global footprint, and indication-led expansion, spesolimab is poised to unlock broader potential in IL-36-mediated

autoinflammatory skin disorders as research and clinical adoption advance.
