Additionally, the sugar is also used in other industries, such as food and cosmetics, which further contribute to its market growth.

Pharma grade powdered sugar, also known as pharmaceutical grade icing sugar, is a type of finely ground sugar that has been specifically manufactured and processed to meet the strict standards and purity requirements of the pharmaceutical industry. It is commonly used as a filler or excipient in medication formulations, particularly for oral solid dosage forms like tablets and capsules. This sugar is made from granulated sugar that is ground to a very fine powder and then further processed to remove any impurities or contaminants.
