According to our (Global Info Research) latest study, the global Pharma Grade Rigid PVC Composite Film market size was valued at US\$ 742 million in 2025 and is forecast to a readjusted size of US\$ 1165 million by 2032 with a CAGR of 6.7% during review period.

Pharma Grade Rigid PVC Composite Film is a high-performance material meticulously engineered for pharmaceutical packaging applications. It is centered around polyvinyl chloride (PVC) as the fundamental component and is fabricated through a combination of advanced technologies and other compatible materials to form a composite structure. This composite film exhibits remarkable rigidity and strength that far exceed those of ordinary packaging materials. Throughout all the processes of drug circulation, be it during bumpy transportation, stacked storage, or frequent handling and sales, it offers steadfast protection to the enclosed medications. It shields them from external forces like compression and impact, effectively maintaining the original forms of solid pharmaceuticals and preventing tablets from crumbling or capsules from deforming.
