Pharmaceutical isolator and barrier system are aseptic solutions for the pharmaceutical industry. The isolation technologies currently used mainly include sterile isolators and restricted access barrier systems (RABS). A pharmaceutical isolator is cheaper and more efficient equipment than cleanrooms for the pharmaceutical industry, especially in aseptic applications. It creates a controlled atmosphere during the production process by scrupulously respecting the different standards required. RABS are a type of restricted access barrier systems for aseptic processing of pharmaceutical products that reduces interventions into the critical zone.
