The product can be classified into less than 10 ml one and more than 10 ml one depending on the volume of the product, which is used in process validation, commercial and GMP manufacturing.

Pharmaceutical prepacked chromatography columns are specialized columns used in the field of pharmaceutical manufacturing and research for separation, purification, and analysis processes. These columns come prepacked with stationary phases that facilitate the chromatographic separation of compounds present in a sample.

Replacing traditional self-packed glass or stainless steel columns, pre-packed columns are packed by experts in state of the art facilities and are delivered ready to use for GMP processing.

As the industry evolves to incorporate continuous processing, pre-packed columns are a perfect fit for multi-column chromatography. Banks of multiple pre-packed columns can be delivered ready to run eliminating the need for multiple self-packed columns. In

In addition, the potential for pre-packed columns to be gamma sterilized provides a compelling value proposition for companies looking to implement multi-column chromatography.
