Abstracts

In organic chemistry, phenols, sometimes called phenolics, are a class of chemical compounds consisting of a hydroxyl group (—OH) bonded directly to an aromatic hydrocarbon group. Phenolic compounds are classified as simple phenols or polyphenols based on the number of phenol units in the molecule. Phenol Derivatives include Bisphenol-A, Phenolic Resin, Alkylphenol, Caprolactum, and others in this study.

Scope of the Report:

This report focuses on the Phenol Derivatives in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The bisphenol-A is projected to be the leading derivative in the phenol derivatives market from 2018 to 2023. Bisphenol-A is majorly used in the production of polycarbonates and epoxy resins. Polycarbonate is majorly used in food and drink packaging such as water & baby bottles, compact discs, impact-resistant safety equipment, and medical devices and epoxy resins are used to coat metal products such as food cans, bottle tops, and water supply pipes. Further the growth in end use industries using polycarbonate and epoxy resin resins will fuel the growth of phenol derivatives market.

The Asia-Pacific region was the fastest-growing market for phenol derivatives, in terms of value, in 2017 and this trend is expected to continue till 2023. China, India, South Korea, and Japan are the major consumers in the Asia-Pacific region. The demand for phenol derivatives is primarily driven by the increasing population & urbanization in these countries which creates huge demand for electronics and automotive goods.

Further these end use industries drives the phenol derivatives market. China is a major growing economy in the world, and the demand for phenol derivatives is expected to increase during the forecast period for the same region.

The worldwide market for Phenol Derivatives is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
