Abstracts

According to our (Global Info Research) latest study, the global Phishing Attack Training Program market size was valued at US$ 499 million in 2025 and is forecast to a readjusted size of US$ 805 million by 2032 with a CAGR of 6.7% during review period.

Phishing attack training programs are systematic security education programs designed for enterprises or individuals. They aim to improve users' ability to identify phishing emails, fake websites, and social media fraud through simulated real attack scenarios, case studies, and practical exercises. This strengthens secure operating procedures and reduces the risk of data leaks or system intrusions due to human negligence. The industry's gross profit margin can reach 40%-55%.

Key market drivers include the following:

First, growth in the market for phishing attack training programs is driven by the persistent prevalence of phishing emails, spoofed websites, and social engineering attacks. Attackers often impersonate customers, suppliers, executives, platform notifications, or system upgrade alerts to trick employees into clicking links, downloading attachments, or divulging account credentials. Because these attacks exploit human errors in judgment, even enterprises that have deployed email gateways and endpoint protection still need training to enhance employees' ability to identify suspicious communications. CISA also recommends that organizations establish anti-phishing training and employee awareness programs.

Second, corporate requirements for security training are shifting from "one-off lectures" to "continuous training." Traditional classroom-style training often becomes a mere

formality; in real-world scenarios, employees may still make errors due to urgency, pressure from authority figures, or deceptive look-alike web pages. Consequently, phishing training programs must integrate simulated emails, case studies, risk alerts, real-time feedback, and tiered education to help employees develop secure response habits in environments that closely mimic reality. Training effectiveness must also be continuously evaluated through testing and behavioral data analysis. Furthermore, factors such as compliance audits, client due diligence, and the cultivation of a security culture have transformed phishing training programs into long-term corporate initiatives. Clients across sectors?including finance, healthcare, manufacturing, education, and government?often need to demonstrate their capabilities regarding employee security training and risk management. Beyond merely defending against attacks, phishing training programs help enterprises identify high-risk departments, optimize email strategies, and refine incident response procedures. Future market competition will center on content authenticity, industry-specific templates, automated operations, employee profiling, and the ability to close the training loop.

This report is a detailed and comprehensive analysis for global Phishing Attack Training Program market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Phishing Attack Training Program market size and forecasts, in consumption value ($ Million), 2021-2032

Global Phishing Attack Training Program market size and forecasts by region and country, in consumption value ($ Million), 2021-2032

Global Phishing Attack Training Program market size and forecasts, by Type and by Application, in consumption value ($ Million), 2021-2032

Global Phishing Attack Training Program market shares of main players, in revenue ($ Million), 2021-2026

The Primary Objectives in This Report Are:

+357 96 030922
info@marketpublishers.com

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Phishing Attack Training Program

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Phishing Attack Training Program market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include KnowBe4, Proofpoint, ESET, Kaspersky, Sophos, Mimecast, Cofense, Barracuda Networks, Inc, AwareGO, Phriendly Phishing, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market segmentation

Phishing Attack Training Program market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for Consumption Value by Type and by Application. This analysis can help you expand your business by targeting qualified niche markets.

Asia-Pacific (China, Japan, South Korea, India, Southeast Asia and Rest of Asia-Pacific)

South America (Brazil, Rest of South America)

Middle East & Africa (Turkey, Saudi Arabia, UAE, Rest of Middle East & Africa)

The content of the study subjects, includes a total of 13 chapters:

Chapter 1, to describe Phishing Attack Training Program product scope, market overview, market estimation caveats and base year.

Chapter 2, to profile the top players of Phishing Attack Training Program, with revenue, gross margin, and global market share of Phishing Attack Training Program from 2021 to 2026.

Chapter 3, the Phishing Attack Training Program competitive situation, revenue, and

global market share of top players are analyzed emphatically by landscape contrast.

Chapter 4 and 5, to segment the market size by Type and by Application, with consumption value and growth rate by Type, by Application, from 2021 to 2032.

Chapter 6, 7, 8, 9, and 10, to break the market size data at the country level, with revenue and market share for key countries in the world, from 2021 to 2026.and Phishing Attack Training Program market forecast, by regions, by Type and by Application, with consumption value, from 2027 to 2032.

Chapter 11, market dynamics, drivers, restraints, trends, Porters Five Forces analysis.

Chapter 12, the key raw materials and key suppliers, and industry chain of Phishing Attack Training Program.

Chapter 13, to describe Phishing Attack Training Program research findings and conclusion.
