Phosphorus-free degreasing powder is an environmentally friendly metal surface treatment chemical. It replaces traditional phosphorus-containing degreasing agents through a phosphorus-free formula design and is mainly used to remove grease, oil stains and impurities on metal surfaces. Phosphorus-free degreasing powder is usually composed of inorganic alkali, inorganic salts, surfactants, detergents and other ingredients. Surfactants are generally used in combination with non-ionic surfactants and anionic surfactants. These ingredients make phosphorus-free degreasing powder have excellent solubility, penetration and degreasing effect.
