The global Photovoltaic Canopy market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Photovoltaic canopy refers to a renewable energy solution that integrates solar panels into the canopy structure. They combine the functionality of canopies with the power of solar power to provide shade, rain protection, and electricity generation for buildings and other sites. A photovoltaic canopy usually consists of a support structure, solar panels and related electrical equipment. Solar panels convert sunlight into electricity, supplying the building's electrical needs while providing comfort to the area under the canopy.
